RE: Curriculum, Instruction and Assessment Committee Update

The Curriculum, Instruction and Assessment Committee met on October 3, 2019. The committee reviewed the Memorandum of Understanding regarding committee membership. The committee established core membership and the need for subcommittees in the future. Also, there was additional discussion pertaining to the Units of Study and Assessments.

Next, the committee briefly reviewed the four action plans.

1. The first action plan includes recommendation of math materials and resources.
2. The second action includes support for additional professional development that supports the District Math Curriculum.
3. The third action plan focuses on creating a professional development schedule to increase and expand the use of MAP data to improve student achievement.
4. The fourth action plan is the development of a K-3 Standards-based Reporting System.
